The fatality rate on South Carolina's non-interstate rural roads is the highest in the country and three and a half times higher than on all other roads in the state according to @TRIP_Inc report released today @scroads <http://ow.ly/wpRI50Ge4Tm>

<https://pic.twitter.com/O2bGs6hdhO>

Greg Dean

liked your Tweet

The efficiency of South Carolina's surface transportation system is critical to the state's economy. @TRIP_Inc report says 465 tons of freight are shipped to, from and through SC each year @scroads <http://ow.ly/NSP250Ge4nq> <https://pic.twitter.com/PjrTo6O2VH>

Greg Dean @CcpaGdean Replying to @TRIP_Inc and @scroads That's a lot of added freight! If it becomes a reality, our infrastructure (health) will be impacted. Makes me wonder if our agencies and consultants are factoring this increased amount into our new pavement designs?

Greg Dean liked your Tweet The tons of freight shipped to, from and through South Carolina is expected to increase 65% by 2045 @TRIP_Inc @scroads <http://ow.ly/2bzF50Ge4u9> <https://pic.twitter.com/INerQxwYC4>
