NY's deteriorating road & highway conditions have a deep impact on NY drivers.

For the average driver, the cost equates to well over \$1,000 per year in extra vehicle costs.

I will join my colleagues in continuing our calls for greater investment in our infrastructure needs.

TRIP @TRIP_Inc · Jan 30
@TRIP_Inc report: Driving on roads that are deteriorated, congested, and that lack some desirable safety features costs New York drivers a total of \$36.7 billion annually #RebuildNYNow

Will Barclay @WillABarclay · 19h

Considering numerous reports from independent sources like @TRIP_Inc have raised concerns about New York's deteriorating roads and bridges in recent years, the missing reports from the state DOT outlining bridge conditions are troubling.

Hudson Valley motorists know this better than most as our state roads are rated among the worst in NYS. It is time for NYS to make the necessary investments in our infrastructure and for the Hudson Valley to get its fair share!
